

Netwrix Auditor

Ease the burden of IT auditing

Automate many of the security, compliance and IT operations tasks that previously required hours to complete, so you can keep your organization secure and compliant without constantly being overburdened.

MINIMIZE THE RISK OF DATA BREACHES

Spot and mitigate risks around your sensitive data before you suffer a data breach. Minimize the impact of security incidents with timely threat detection and response.

ACHIEVE AND PROVE COMPLIANCE

Streamline compliance with out-of-the-box reports aligned with GDPR, PCI DSS, FISMA/NIST, HIPAA and many other regulations, and quickly address ad-hoc questions from auditors.

INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Empower your IT teams to quickly uncover, investigate and remediate threats, and automate reporting to save time while keeping stakeholders informed.

CUSTOMER FEEDBACK

"We don't like vendors; we like partnerships. Netwrix has virtually become part of our staff. With Netwrix Auditor, our IT team gets back valuable time, which makes our organization more efficient in accomplishing our goals for the county."

IT Director, Washington County,
Arkansas

Key Features of Netwrix Auditor

IDENTIFY SECURITY GAPS

Identify data and infrastructure security gaps, such as a directly assigned permissions and inactive accounts ripe for takeover, and take corrective actions to minimize the risks of a data breach.

DETECT THREATS IN TIME TO PREVENT DAMAGE

Be the first to know about suspicious activity around your sensitive data so you can respond before you suffer data breaches and system failures or get slapped with fines for noncompliance.

SPEED INCIDENT INVESTIGATION

In a few clicks, find the exact details you need to the bottom of an incident, resolve a user issue or respond to ad-hoc questions from auditors, whether it's all access events for a particular user or all activity related to a certain file.

DELEGATE ACCESS MANAGEMENT

Accurately enforce least privilege while freeing up your IT teams: Enable business users to make access requests for data owners to approve or deny, and empower data owners to regularly review permissions to their data.

SPOT EVEN SOPHISTICATED THREATS

Spot malicious insiders and compromised accounts with a comprehensive view of all anomalous activity by individuals, ranked by cumulative risk score.

ACHIEVE AND PROVE COMPLIANCE

Prove to external and internal auditors the strength of your access controls around sensitive data wherever it resides with easy-to-digest reports.

HOW IS NETWRIX AUDITOR DIFFERENT?

QUICK ROI

Start getting value right out of the box and receive return on your investment in days, not months. Don't pay for expensive professional services or spend time on a lengthy deployment process.

RESTFUL API

Integrates with other security, compliance and IT automation tools, so you can easily expand visibility to other systems and have your entire audit trail available from a single place.

NON-INTRUSIVE ARCHITECTURE

Avoid the nightmare of intrusive agents and undocumented data collection methods.

FIRST-CLASS TECHNICAL SUPPORT

Have your issues promptly resolved by first-class technical support team with a 97% satisfaction rate.
